

**DS2**

**DATA RIGHTS  
MANAGEMENT  
(DRM)  
MODULE**

**DS2 DRM**

Enhance management and security aspects of digital asset transactions through a robust blockchain-based Data Rights Management (DRM) system by DS2. Designed to perform critical functions, including notarization, tracking, and validation of all data rights transactions, DS2 DRM works great within individual Dataspaces and across multiple participating Dataspaces.

This project has received funding from the European Union's Horizon Europe research and innovation programme under grant agreement No 101135967.
